

# SureLock Studio for Windows Mobile

## Lockdown Software for Windows Mobile Devices

### Key Features

- Allows execution of "approved" applications only
- Disable hardware keypad
- Disable ActiveSync
- Disable Autorun
- Password protection for administrator access
- Battery Indicator
- Phone Signal Indicator

And many more...

### Supported Platforms

- Windows Mobile 6.5 (Classic & Professional)
- Windows Mobile 6.1 (Classic & Professional)
- Windows Mobile 6.0 (Classic & Professional)
- Windows Mobile 5.0 (Pocket PC and Pocket PC Phone Edition)

### Key Benefits

- Increase productivity of Mobile Workers
- Reduce device maintenance and support costs
- Avoid misuse of company devices
- Easy to deploy and update on mobile devices

---

Are you concerned if mobile devices of your company are actually being used by the workers for business purposes only and not for personal use?

An open Windows Mobile device provides a big opportunity for users to use the company device for entertainment and gaming purposes, which can badly affect the productivity.

Besides, an inexperienced worker can also corrupt the device settings unintentionally, rendering the device useless for hours, which will again result in loss of crucial business hours.

**SureLock Studio** locks down Windows Mobile devices and restricts the users to launch and use only the "approved" applications and features of the mobile device. This is also called Kiosk Mode of operation.

# SureLock Studio for Windows Mobile

## Features

- Allow execution of "approved" applications only
- Disable Hardware keypad completely or only some selected keys
- Disable ActiveSync
- Disable Phone functionality
- Disable Autorun from external storage media (e.g. SD Card)
