Accelerating Digital Transformation

For decades, the IT-controlled desktop was the main productivity tool in the enterprise. Today, mobile workers no longer want to be tethered to locked-down PC workstations, and they expect IT to support the mobile devices and apps they need to stay productive wherever they work.

42Gears Unified Endpoint Management Solution provides the fundamental visibility and IT controls needed to secure, manage, and monitor any corporate or employee-owned mobile device or desktop that accesses business-critical data. It allows organizations to secure a vast range of employee devices being used within the organization while managing the entire lifecycle of the device used by the field workforce.

One Management Architecture for All Endpoints

Key Components of 42Gears UEM Solution
