

SureMDM

Centralized Mobile Device Management

Manage, Support and Secure Enterprise mobile devices

Key Features:

- Simple Administrator Console
- Software Deployment
- Remote Control
- Remote File Explorer
- Remote Process Viewer
- Remote Lock
- Remote Data Wipe
- Lock down with SureLock
- Text Messaging
- Location Tracking with GPS*
- Device Service and Repair Management

Key Benefits

- Reduce mobile device TCO (Total Cost of Ownership)
- Improve Employee productivity by increasing mobile device uptime
- Satisfy end-users by remotely troubleshooting mobile device issues

Supported Platforms

- Windows Mobile 5.0, 6.1, 6.5
- Windows CE 5.0, 6.0
- Android 2.2+

SureMDM eliminates the overhead of managing various aspects of mobile devices and allows you to optimize their performance all from a simple to use web-based console. This helps you keep them up and running more efficiently, while lowering the total cost of ownership, and decreasing support costs by centralizing the help desk for device-related issues.

SureMDM

Centralized Mobile Device Management

 - Complete Integration with SureLock
- Remote Lock and Data Wipe
- Send Text Messages to users
- Group devices (e.g. location-wise, department-wise etc)
- Generate extensive reports with built-in templates
- Device Service and Repair Management

The screenshot displays the SureMDM web interface. At the top, it says 'SureMDM Comprehensive mobile device management'. Below this is a navigation bar with icons for various functions and a search box labeled 'Type here...'. On the left, there is a sidebar menu with 'System' (containing India, US, UK, Preapproved, Unapproved, Blacklisted), 'Remote Support', 'Jobs', and 'Reports'. The main area shows a table of devices with columns for Device, IP Address, Status, and Last Connected. The table lists several devices, including 'MC70 WM 6.1' which is online. Below the table, there is a detailed view for a selected device, showing 'Device Status' (Motorola MC70 WM 6.1), 'Network Status' (TATA DOCOMO), 'Battery Status' (Main Battery at 83%, Backup Battery at 100%), and 'Memory Status' (Program Memory and Storage Memory usage).
