Enable/Disable Download/ Upload of Files

What is SureFox?

Businesses require use of browsers to run web applications on Android devices and then there are situations when controlled web access for the users is required to ensure resourceful and appropriate use of the devices.

SureFox creates locked browsing environment in your Android devices making them apt for deployments as public web kiosks or as field devices for your mobile workforce.

How does it work?

Download and Install SureFox on your Android tablet or stick. Access the password protected SureFox Settings and specify the websites that you wish to allow. SureFox will then block all other websites except the ones specified in SureFox and allow the users to browse the allowed websites in locked down kiosk mode.

Key Benefits:

- Maximizes Workforce Productivity with Restricted Browsing
- Quick and Easy Installation/Configuration of your device for Kiosks
- Reduces Time and Cost involved in Device Maintenance
- Customizable Interface for Cohesive Look of the Lockdown Device
- Easy Mass Deployment with Cloud Export and Import of Settings

Supports:

Android 2.2+
