Using KioskIE with SureLock	. 12

Overview

Web-based applications are easy to develop and deploy and hence offer significant advantages to businesses.

42Gears' KioskIE is a browser lockdown solution which gives enterprises a controlled environment to deploy their web based business applications. KioskIE's unique features maximize the productivity of mobile workers, minimize application support and device maintenance.

Features

- Allowed website list
- Fullscreen mode
- Block access to browser settings
- Disable keypad
- Custom Shortcut Menu

Requirements

• .NET CF v2.0

Installation

- Download KioskIESetupWM65.CAB
- Install the CAB file on the device.

Configuration

• Go to the Start screen and launch KioskIE icon. See below:

• Following configuration screen will show up.

Following parameters can be configured :

- Enable KioskIE : Enables/disables the lockdown of the default Internet Explorer browser on the device.
- Allowed website list: If enabled, this setting can restrict access to allowed urls and domain. In order to specify the whitelisted urls, click on the button to the right.

Following screen comes up

Please note that domain names must be exactly specified. For e.g. <u>www.mycopany.com</u> is not same as subdomain.mycompany.com

- Enable Logging: Enables file logging for debugging purposes.
- **Disable Keypad**: Enables/disables keypad access during browsing session.
- Show Address Bar: If enabled, address bar is visible at the top during page load. However, user cannot use the address bar to enter new URLs, stop current navigation, etc.
- Set Password: Press this button to go to set new password screen.
- Version: Press this button to view the version information of KioskIE.

Usage

- 1. Ensure the device has connectivity
- 2. Launch Internet Explorer (make sure KioskIE is enabled and configured as per previous section)
- 3. Internet Explorer will start in locked down mode. Access to browser settings and Tap and Hold menu will be disabled.
- 4. Custom shortcut menu is displayed on tap and hold.

Password protected settings

Administrator can protect KioskIE settings by specifying a password.

Press "Set Password" button on the KioskIE config screen to set/modify/disable password.
