### Why do you need SureLock?

Smartphones and tablets provides an extensively powerful platform to perform almost all kinds of business productive activities. However an open mobile device provides a big opportunity for users to use the company device for his personal interests, entertainment and gaming purposes too, which can badly affect the organization's productivity.

Besides, an inexperienced worker can also corrupt the device settings unintentionally, rendering the device useless for hours, which again results in loss of crucial business time.

### What is SureLock?

**SureLock** provides comprehensive lock down solution for tablets & mobile devices. It restricts the users to launch and use only the "approved" applications and features of the mobile device. This is also called **Kiosk Mode** of operation.

Apart from securely locking your device, SureLock provides UI customization options such as wallpaper, application icons, widget support and icon relocation on its home screen What this means to you is complete access to device whenever

### Key Benefits:

- Increase productivity of Mobile Workers
- Reduce device maintenance and support costs
- Prevent device misuse
- Password-protect sensitive data and applications
- Over The Air (OTA) device lockdown settings

### Supported Platforms:

- Android
- Windows 7 & 8

# SureLock
