Subject - Status update on PCI-DSS Compliance

To Whom It May Concern:

This status update letter has been created by Crossbow Labs LLP, a PCI QSA Company and an IT Security Auditing Organization empanelled with CERT-In for **42Gears Mobility Systems Private Limited**, regarding **Application Resilience and Penetration Testing** for below mentioned applications.

Application(s) as part of scope:

- 1. SureMDM UEM Console(Web) Version Styx v6.62.2**
- 2. SureMDM Nix(Android) Version 18.08**
- 3. Enterprise Agent(Android) Version 3.87**
- 4. SureLock (Android) Version 14.04**

Application testing was done as per the PCI DSS v3.2.1 guidelines. Based on the reading of the report, we confirm that there are no High and Medium vulnerabilities as per CVSS (Common Vulnerabilities Scoring system).

This letter is issued on the request of the 42Gears Mobility Systems Private Limited, and is intended for limited and restricted circulation to the concerned parties only. For details on the scope and inclusions, please refer to the detailed report dated **03-Jul-2020**.

Authorised Signatory,

Rosan Thomas (PCI QSA)
