42GEARS®

Surefox™ Secure Browser

Supported Platforms

SureFox secure browser by 42Gears UEM creates a safe and secure browsing environment on mobile devices and desktops. This makes mobile devices suitable for use as self-service web kiosks and even data collection terminals for various business types.

Restrict Users To Only Allowed Websites

SureFox allows browsing of selected websites and webpages on a mobile device. Choose a single website or multiple websites to turn your Android, iOS or Windows mobile devices into web kiosks within minutes.

Device Security

SureFox blocks access to all non-whitelisted websites, device home, device settings, lockdown settings and even disables hardware keys. It also disables the title bar or bottom bar to restrict quick access to notifications, recent apps and settings.

Cloud Support

SureFox enables export and import of lockdown settings to a secured Cloud for easy mass configuration and deployment. Use Cloud option to setup auto-configuration of device and lockdown settings.

Highly Customizable UI

SureFox also offers options to customize the look and feel of the web kiosk. Set wallpapers, add screensaver and specify screen behavior on specified status and more.

SureFox - Secure Browser

Key Features:

Whitelist Websites

Whitelist and allow browsing of only approved website(s) that are required by the users.

Launch at Startup

Set a website to launch automatically whenever a device is switched on or rebooted.

Device Security and Hardware Keys Restriction

Secure devices with blocked access to apps, lockdown device settings and device home.
Disable external hardware keys of mobile devices including volume buttons, power button, etc.

Branding and Personalization

Brand mobile devices by customizing the UI with wallpapers, icons, screensaver, title bar, etc.

Content Filtering for Selected websites

Block access to web pages containing the identified keywords.

Content Blocking Analytics

Generate useful insights into blocked web pages and keywords through SureMDM reports.

Peripheral Settings

Disable mobile device peripherals like Bluetooth, Wi-Fi, Camera, Mobile Data, GPS, etc.

Auto Lockdown Configuration

Set import/export from cloud to schedule auto update lockdown and device settings.

Compatibility with SureMDM - Mobile Device Management Solution

Use SureMDM's inbuilt option to remotely install, configure and manage SureFox.

SureFox Analytics

Get insights of whitelisted websites usage and the duration for which they were browsed.

Battery Saving

Enable battery saving features like auto brightness adjustment, brightness on battery level, etc.

Offline Activation

Activate SureFox without internet connection using device details like IMEI, Wi-Fi MAC and GUID.
