

# SureLock®

## Kiosk Lockdown Software

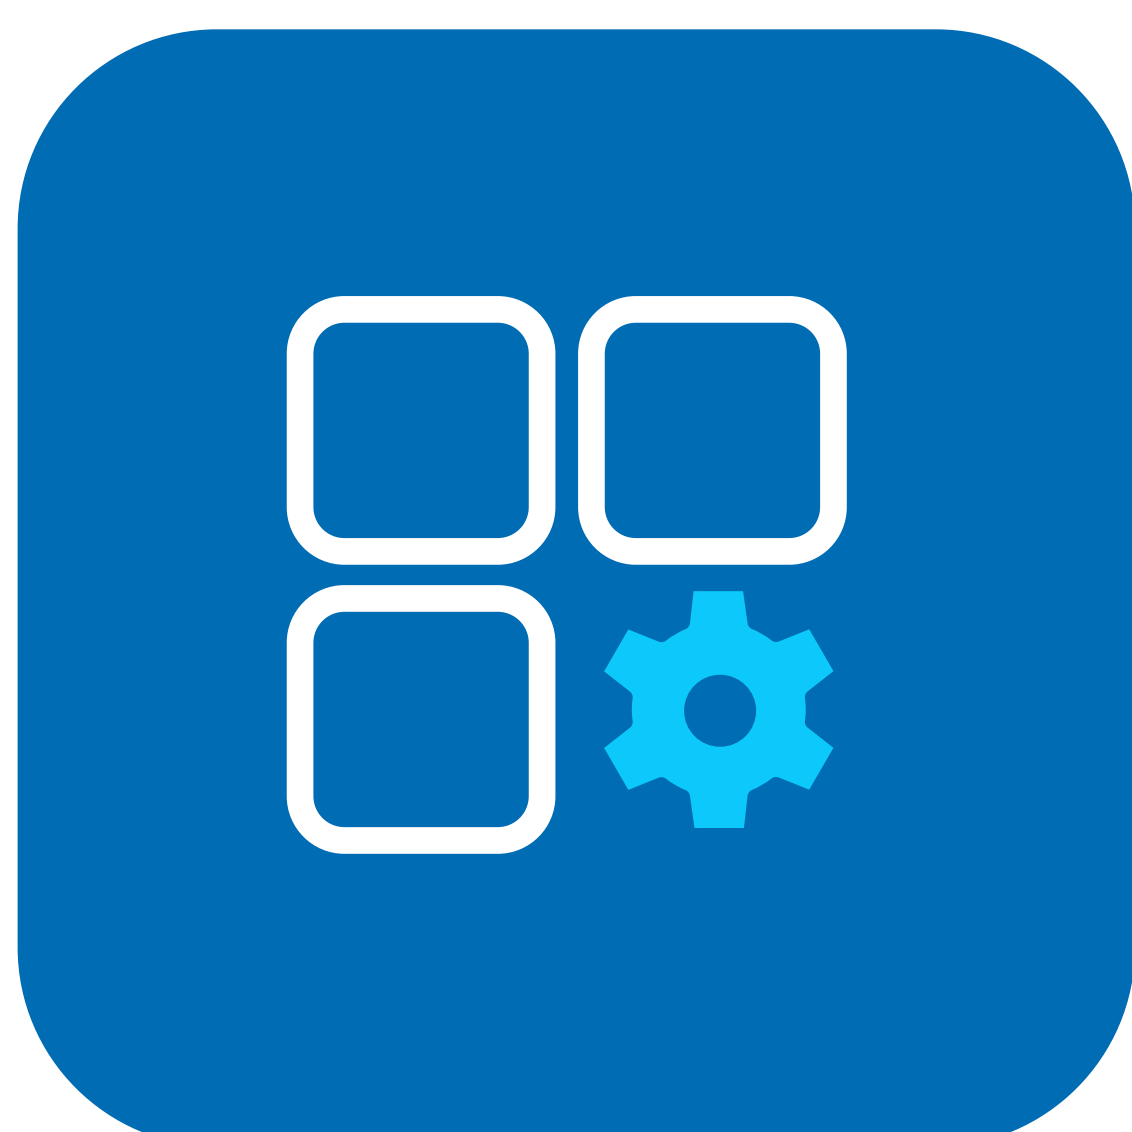

## Supported Platforms

Equipping your workforce with mobile devices or incorporating self-help kiosks can certainly help your business. This allows end-users to access business information anytime anywhere. Limited abilities in business devices mean higher user productivity and reduce device maintenance time and cost.

SureLock offers a quick and easy way to lock down off-the-shelf mobile devices and convert them into purpose-specific devices with a few minutes. Tablets, smartphones, desktop computers/laptops, VR devices and even smartwatches can be transformed as dedicated purpose devices.

### **Application Management**

You can use SureLock to allow only selected applications to run on the device. Choose just a single application or multiple applications to turn Android, iOS, Windows, Virtual Reality and Wear OS devices into purpose-specific devices within minutes.

### **Device Security**

SureLock blocks access to all non-approved applications, device settings, lockdown settings, hardware keys and diagnosis modes like Safe Mode to offer the most secure environment for your purpose-specific mobile devices. SureLock also offers robust lockdown with options to disable Wi-Fi, Airplane Mode, USB port, hardware keys, etc.

### **Cloud Support**

SureLock offers export and import of lockdown settings to a secured Cloud for easy mass configuration and deployment. You can also use the Cloud option to setup auto configuration of the mobile device and lockdown settings.

### **Highly Customizable UI**

SureLock also offers options to customize the look and feel of your lockdown device. Set wallpapers, add screensavers, specify screen behavior on the specified status and more.

SureLock, a lockdown solution lets you restrict users to only allowed apps on the device. It lets you convert mobile devices into kiosks, allows remote mass device configuration to save time and advanced lockdown features to offer comprehensive device and data security.

# SureLock - Kiosk Lockdown Software

## Key Features:

### Application Management

Whitelist and approve functioning of only approved application(s) on the device.

### Single Application Mode

Lockdown mobile device into kiosk mode with access to just a single application.

### Device Security

Secure devices with blocked access to lockdown/device settings including Safe Mode.

### Branding & Personalization

Brand mobile devices with customized UI; wallpapers, icons, screensaver, title bars, loading screen, etc.

### Device Peripheral Locking

Disable mobile device peripherals like Bluetooth, Wi-Fi, Camera, Mobile Data, GPS, etc.

### Multi User Profiles

Allow different users to access the same device with different lockdown profiles.

### Driver Safety

Set speed threshold to prevent drivers using mobile devices while driving above specified speed.

### Auto Lockdown Configuration

Use settings import/export from cloud to schedule auto-updates of lockdown and device settings.

### Compatibility with SureMDM - Mobile Device Management Solution

Use SureMDM's inbuilt option to remotely install, configure and manage SureLock.

### Disable Hardware Keys

Disable external hardware keys of the mobile devices including volume buttons, power button, etc.

### SureLock Analytics

Get insights into the applications used by the user and the duration for which they were used.

### Battery Saving Features

Enable battery saving features like auto-brightness adjustment, brightness on battery level, etc.

### Offline Activation

Activate SureLock offline using device details like IMEI, Wi-Fi MAC and GUID.

### Multi User Profile Settings

Allow sharing of a single device with multiple user profiles and save on hardware costs.

### In-built Plugins Apps\*

Use in-built utility apps to allow users to use features like Wi-Fi, Hotspot, Screen Brightness, Bluetooth Settings without compromising the device security lockdown.

\* - Only available for Android devices

## About 42Gears

42Gears is a leading Unified Endpoint Management solution provider. Customers can choose between Software as a Service (SaaS) and on-premise solutions to secure, monitor and manage their business endpoints. 42Gears supports almost any endpoint, including tablets, phones, rugged devices, desktops, wearables, and more. With over 18,000 customers in 115 countries, 42Gears solutions have a proven track record of success in almost any industry and scale.
