

Application Kiosk Lockdown Solution

Supported Platforms

SureLock by 42Gears is a user-friendly application kiosk lockdown solution to improve user productivity, lower device maintenance costs, tighten device security, and more. Easily lockdown and convert off-the-shelf Android and Windows devices such as desktop computers/laptops, tablets, smartphones, VR devices and even smartwatches into dedicated-purpose devices in minutes.

SureLock - Application Kiosk Lockdown Solution

Key Features:

Application Management

Approve or block the functioning of only approved application(s) on the device.

Single Application Mode

Convert mobile devices into kiosks with access to a single application.

Device Security

Secure your purpose-specific mobile devices by blocking access to lockdown/device settings, factory reset, and safe mode.

User Security

After the specified idle timeout interval, a user is required to enter a valid password to access the SureLock home screen.

Auto Lockdown Configuration

Without physically connecting to devices, import/export from the SureLock cloud server to configure device lockdown settings and schedule auto-updates of SureLock configuration.

Branding and Personalization

Add branding elements such as wallpapers, icons, screensavers, title bars, loading screens, and loading messages to your UI for a personalized look and feel.

Disable Device Peripherals

Enhance data security by allowing or disabling mobile device peripherals such as Bluetooth, Wi-Fi, Camera, Mobile Data, GPS, etc.

Disable Hardware Keys

Disable the mobile device's external hardware keys, such as the volume and power buttons, to prevent factory resets, screenshots, and entering safe mode.

Multi-user Profiles

Save hardware costs by sharing a single device with multiple users using the **Shared User** mode. SureLock also supports integration with LDAP and Azure AD for user authentication during device sharing mode.

SureLock - Application Kiosk Lockdown Solution

Compatibility with SureMDM and SureFox

- ▶ SureLock can be remotely installed, configured, and managed with SureMDM's built-in option.
- ▶ Create a shortcut to SureMDM jobs on the SureLock home screen and execute them whenever required.
- ▶ SureFox, 42Gears' Browser Lockdown Solution, is now integrated with the SureLock application; no separate installation or license is required.

Driver Safety Mode

Admins can set a speed threshold, receive alerts, and also prevent the driver from using the device if the threshold is exceeded.

SureLock Analytics

Get insights about the applications used by the user and how long they were used for. Export these reports to your email, SureMDM console, or save as local files.

Battery Saving Features

When the battery level falls below the set battery percentage, battery-saving features such as auto-brightness adjustment, brightness on battery level, and so on can be enabled with SureLock.

Offline Activation

Activate SureLock offline using device details like IMEI, Wi-Fi MAC, and GUID.

In-built Plugins Apps for Android Devices

Use in-built utility apps like Bluetooth Manager, Wi-Fi Center, Wi-Fi Hotspot Manager, and others that have been pre-approved by the Admin without compromising the device's security lockdown.

Multi-language Support

SureLock currently supports English, French, German, Spanish, and Italian.

Why choose SureLock?

Flexibility and Adaptability

Support for various device types and Operating Systems.

Time-saving

Enable remote mass device configuration and auto-updates.

Product Customization

Quick turnaround on feature and customization requests.

Advanced Lockdown Features

Driver safety mode and disabling of device peripherals offer comprehensive device and data security.

Cost-effective

Easy and affordable way to secure mobile devices into dedicated kiosks.

Hardware Cost Reduction

Reduce hardware cost with device sharing and multi-user profiles.

Real-time Support

24/7 real-time technical support via call/chat/email/ticket.
