

CAMLOCK

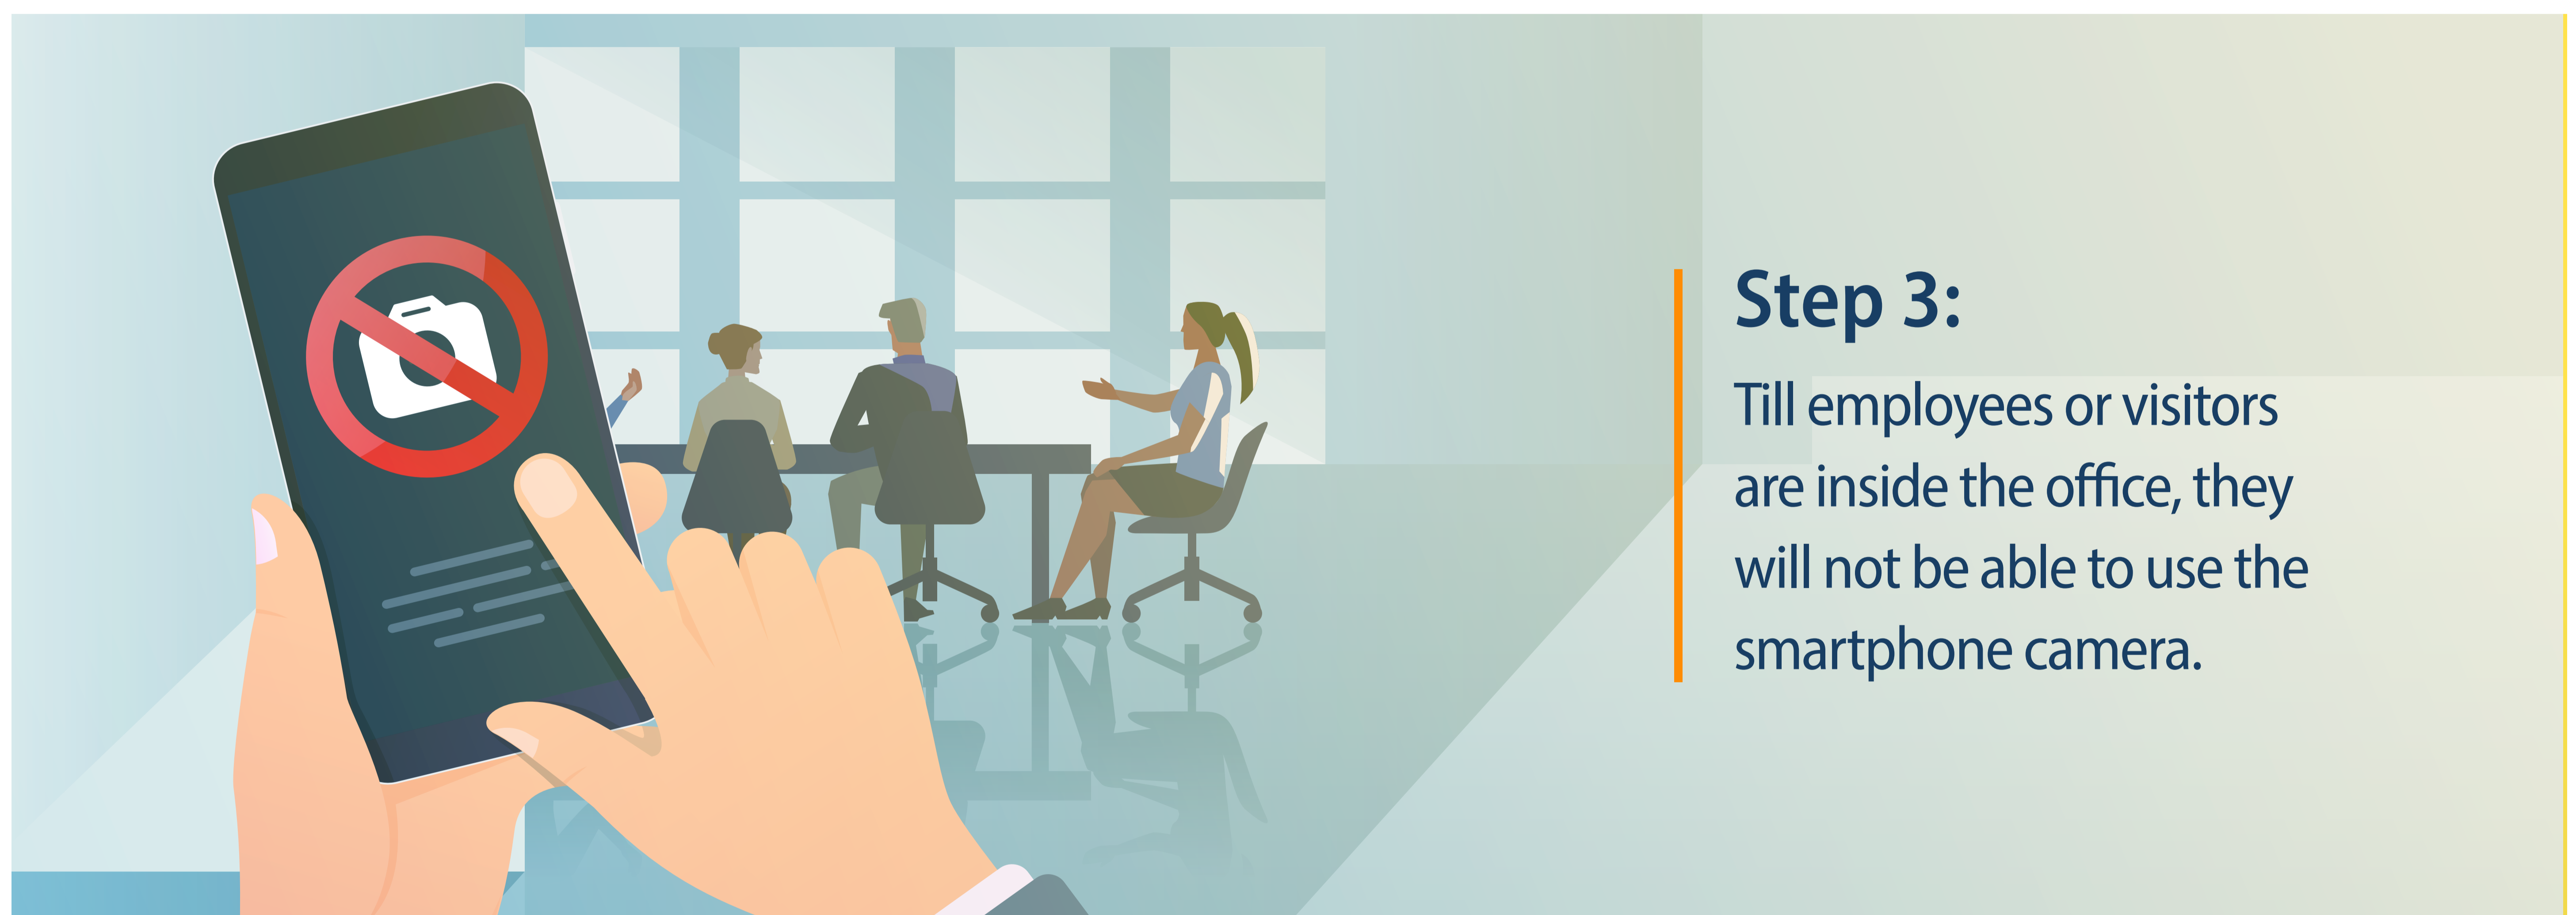

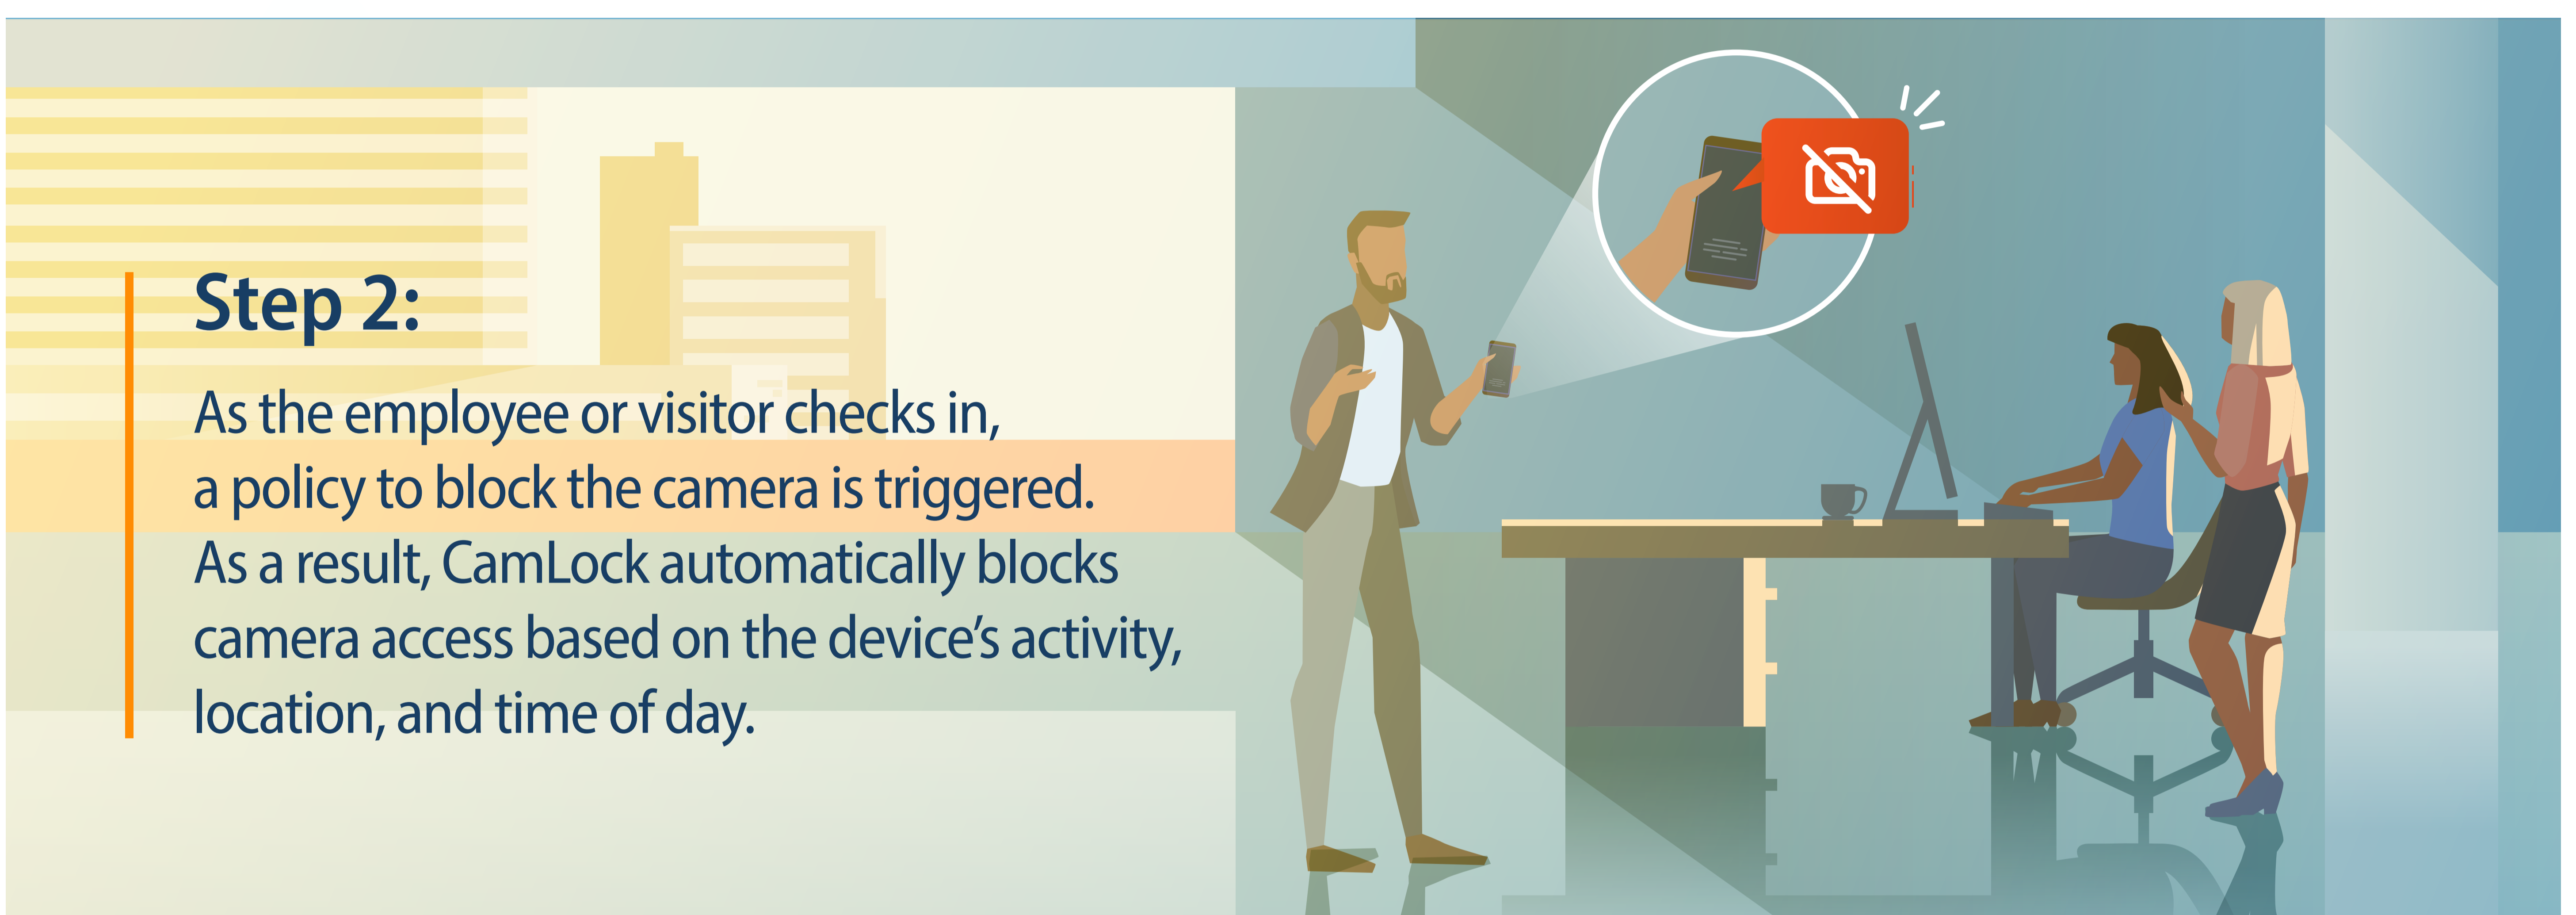

**Secure and protect
your enterprise-sensitive data**

With businesses riding the wave of digital transformation, mobile devices have become a norm in the workplace. However, in addition to all the benefits that it brings to the table, like employee enablement, improved productivity, and streamlined processes to name a few, the use of mobile devices has also brought certain security concerns in its wake - data breaches being the most significant of them all. As such, most enterprises have security policies in place to prevent data leaks. But one big loophole still remains - data leak through pictures taken using mobile cameras.

To support enterprises in this regard, 42Gears has launched CamLock - an intelligent camera blocking solution. CamLock is designed to block a mobile device's camera based on activity, location, and time of the day.

How CamLock Works

Features of CamLock

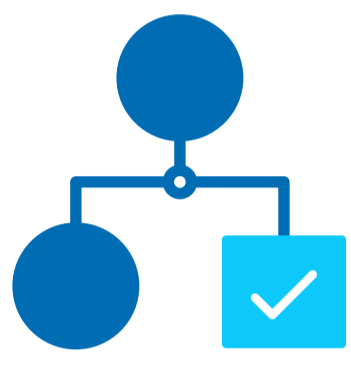

Data Protection:

Prevents data leakage by blocking the camera of Android devices

Adaptation:

Block the device cameras based on device activity, location, and time of day to adapt to business processes.

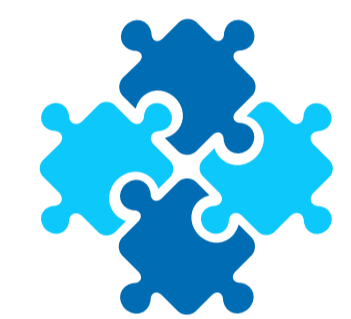

Undisrupted Workflow:

Being a lightweight solution, it doesn't interfere with the device's workflow.

OS Support:

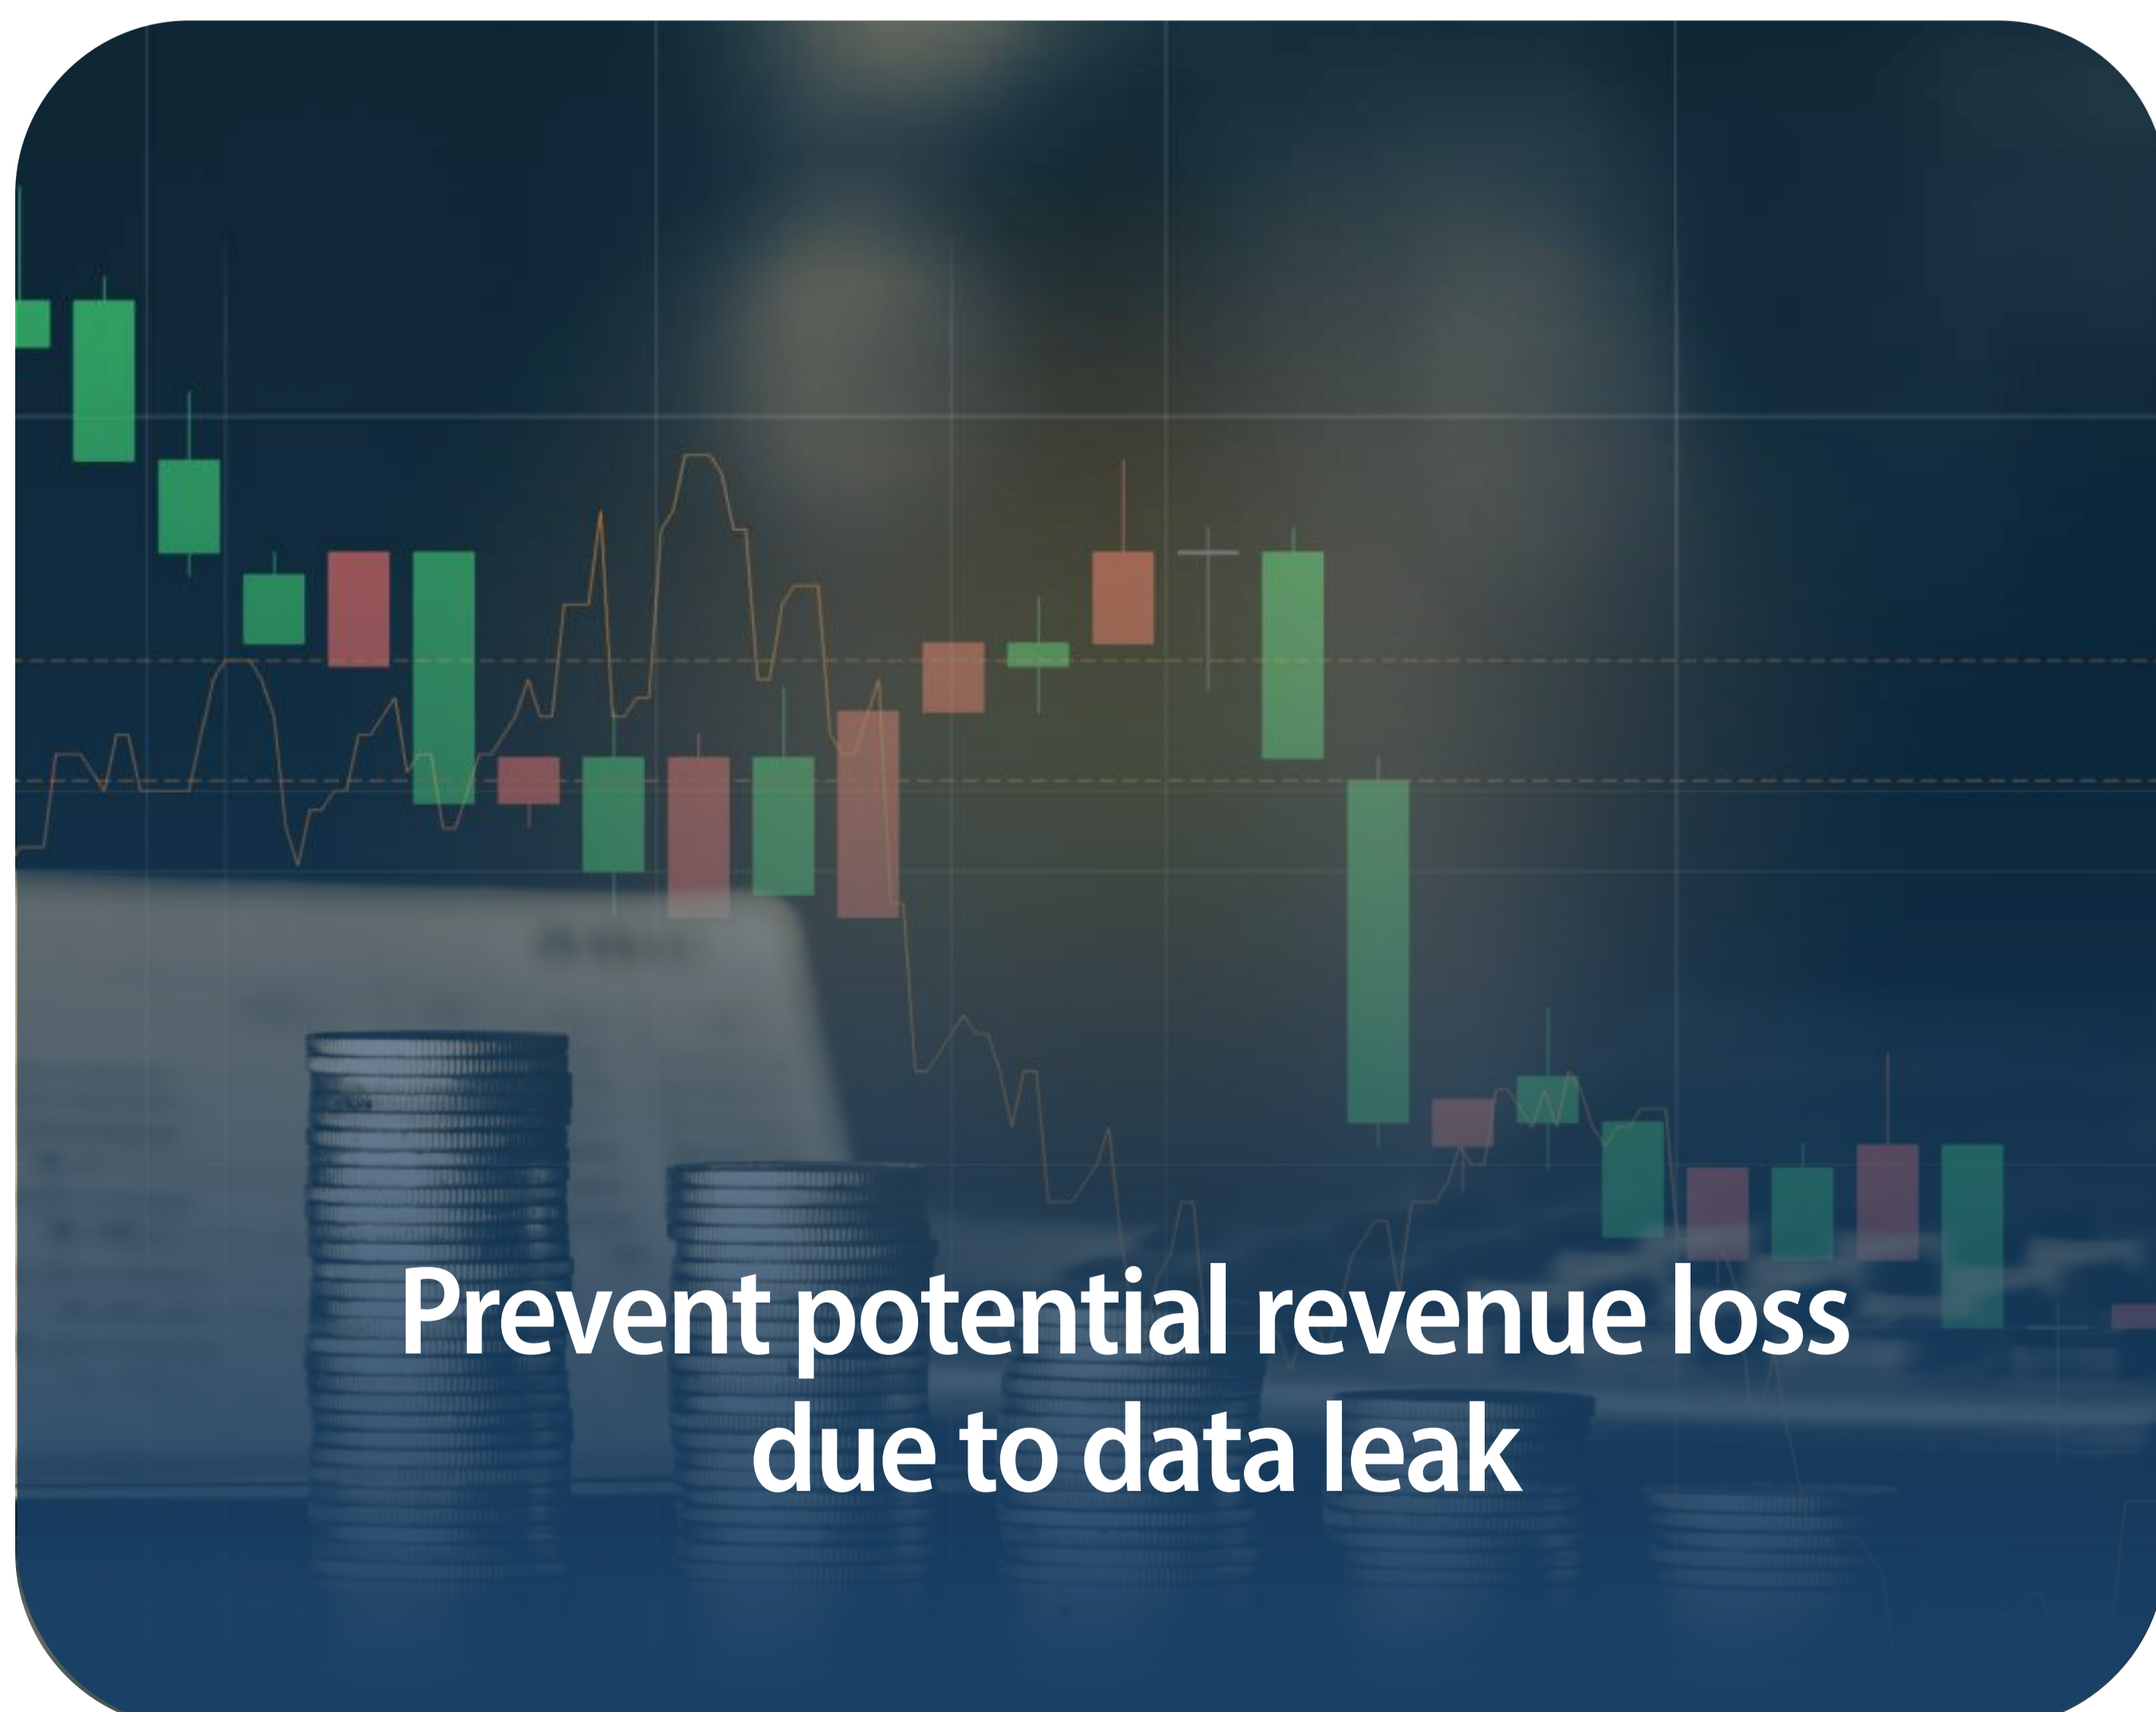

Supports devices based on Android 7.0 and above

Integration:

Integrates with 3rd party solutions such as attendance management systems, visitor management systems, etc.

Benefits of Using CamLock

Use Case of CamLock

Healthcare & Pharma:

Employees and third party service providers cannot access patient records and proprietary/sensitive business data.

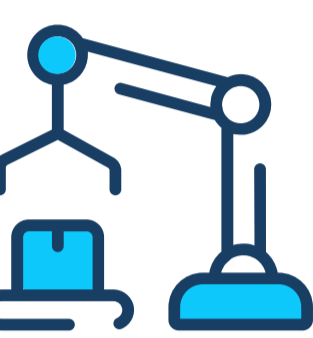

Banking:

Employees and visitors cannot capture and share confidential customer or financial data with others.

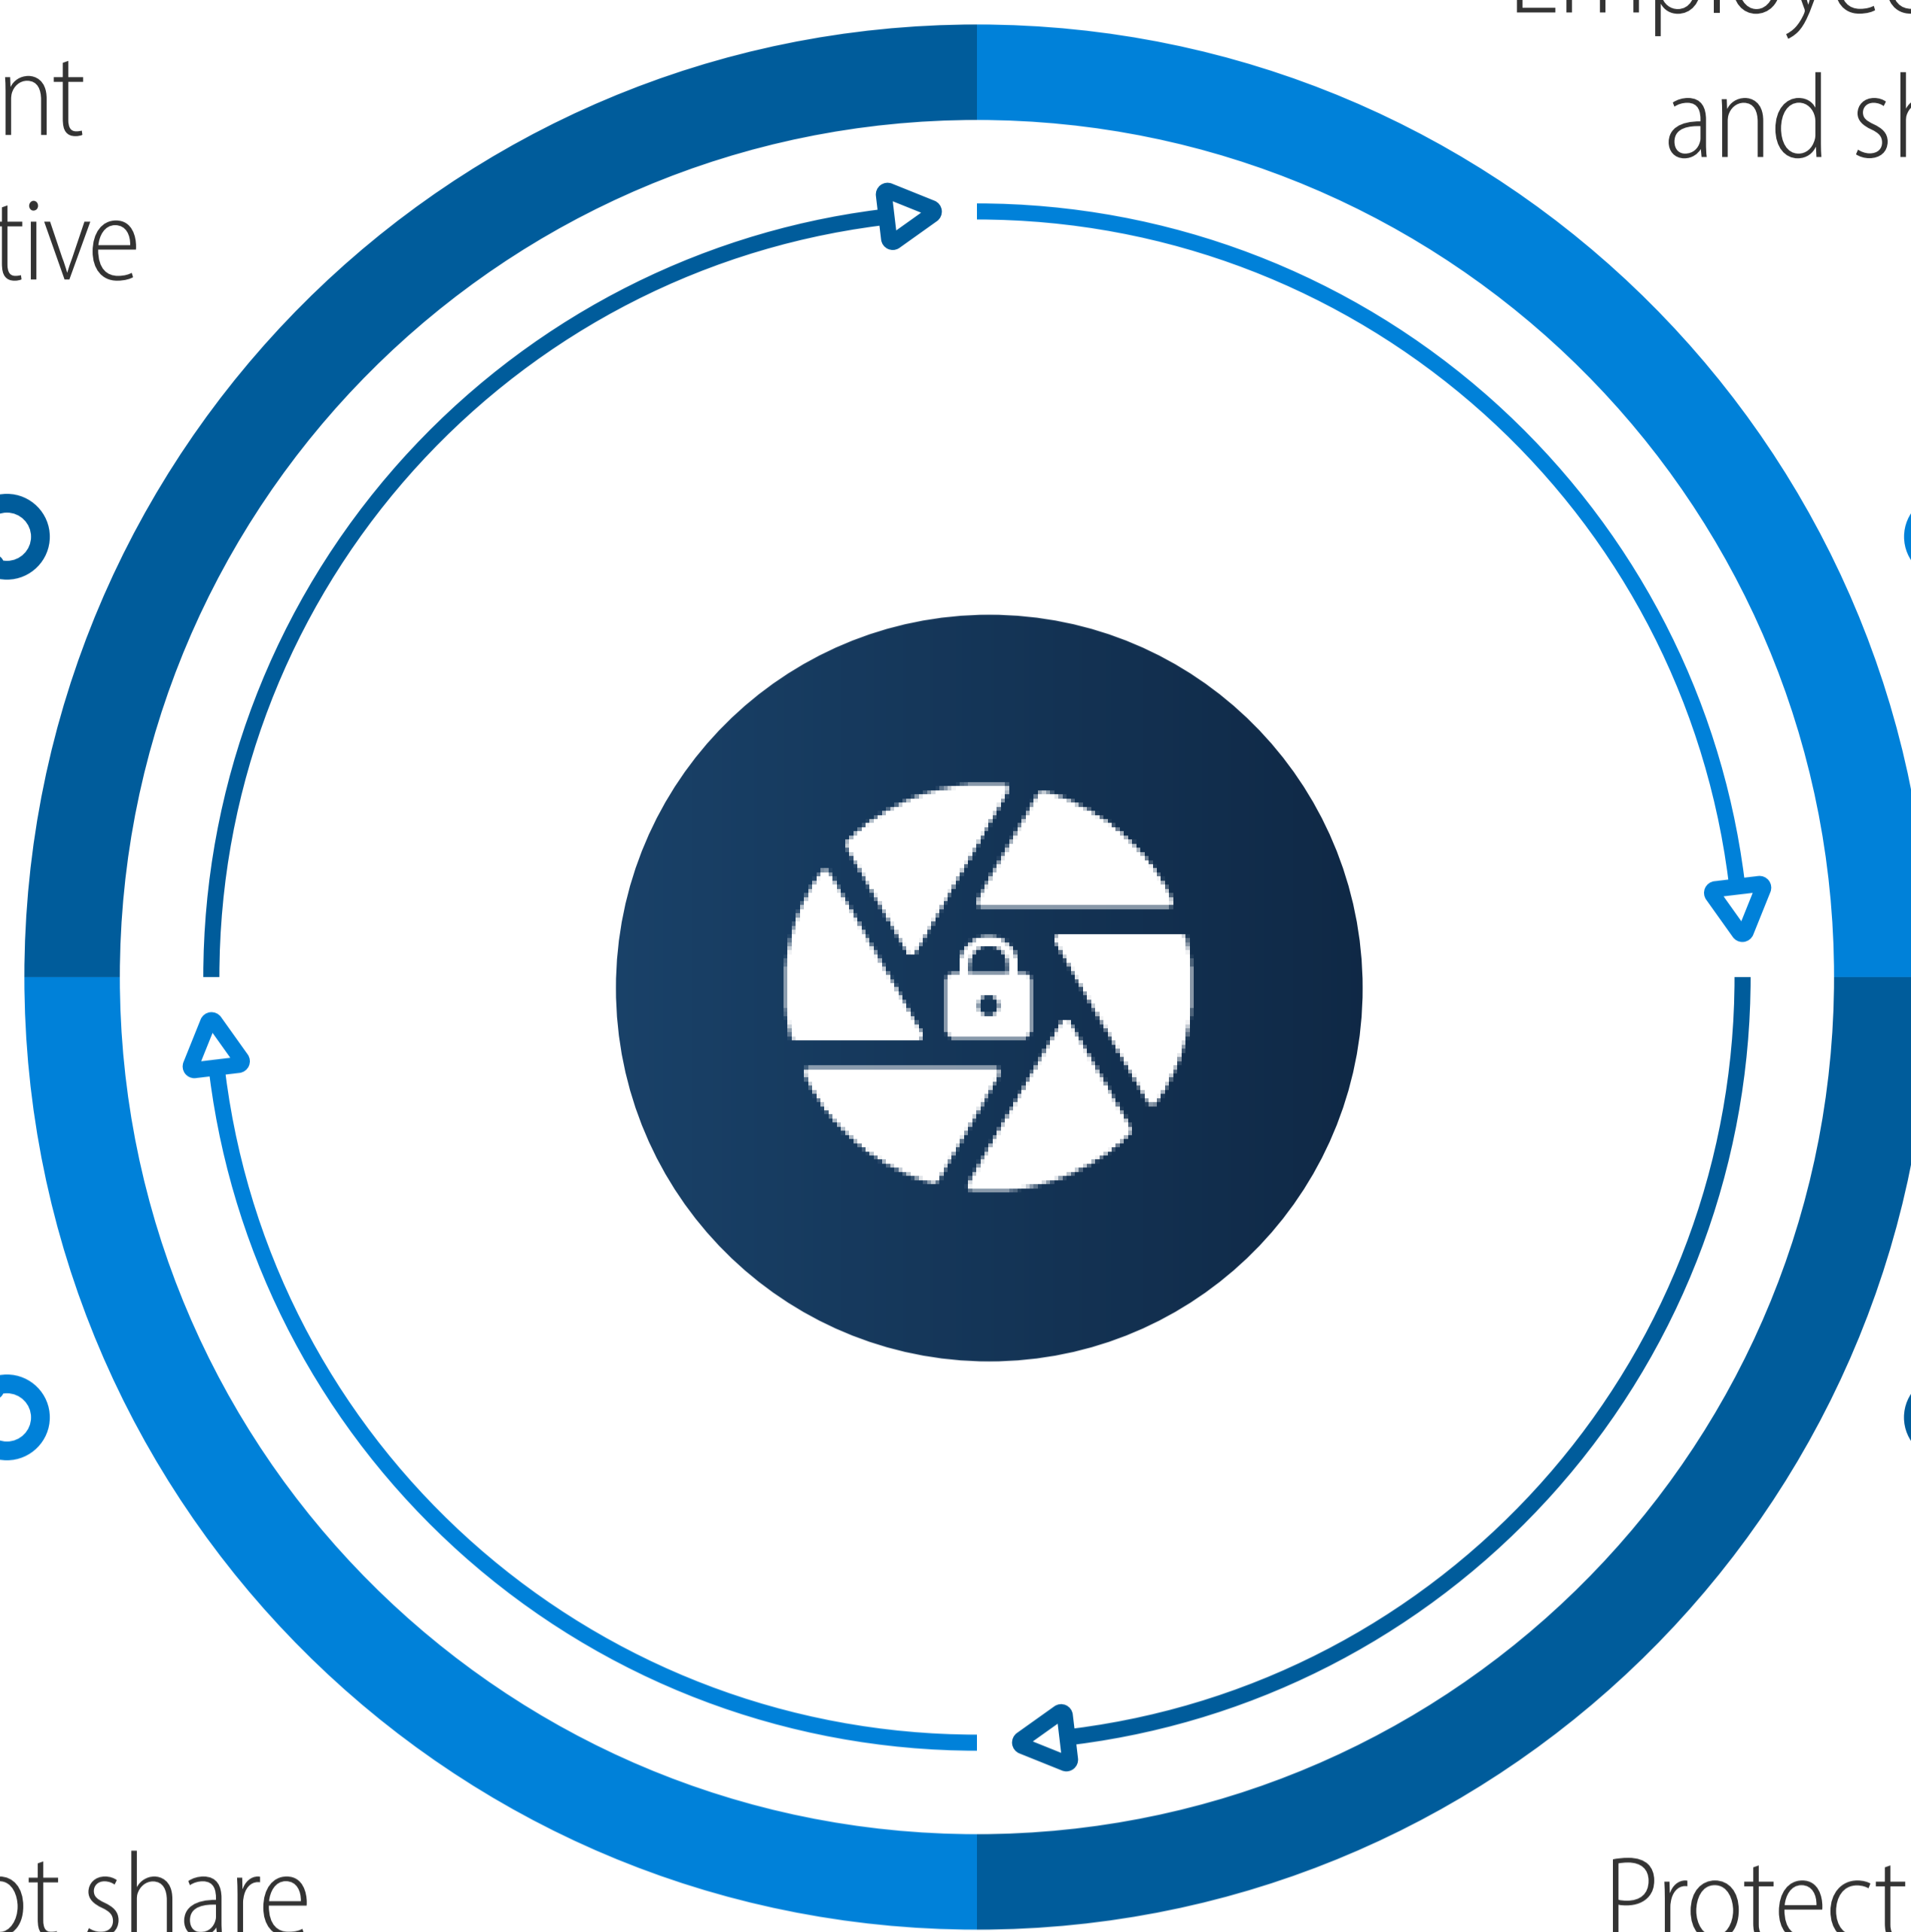

Retail:

Employees or vendors cannot share product pricing and the company's financial data with competitors.

Automotive:

Protect manufacturing designs and proprietary product development data from leaking.

About 42Gears

42Gears is a leader in enterprise mobility management, offering cutting-edge solutions that aim to transform the digital workplace. Delivered from the cloud and on-premise, 42Gears products support all major mobile and desktop operating systems, enabling IT and DevOps teams to improve frontline workforce productivity and the efficiency of software development teams. 42Gears products are used by over 18,000 customers across various industries in more than 115 countries and are available for purchase through a global partner network.
